

LG and Google ChromeOS

# Better Together.

Google ChromeOS is a fast, secure, and easy-to-manage platform that complements the performance requirements of LG's digital displays. This cloud-first solution is a fast, easy-to-manage, and secure operating system that's easy to deploy across a network of displays that can be used for advertising, wayfinding, menus, scheduling, and corporate communications.

## LG Commercial Displays

LG Commercial Displays with Google ChromeOS are designed to deliver outstanding performance for virtually any business. Advanced IPS panels yield impressive brightness and color reproduction with low power consumption. LG commercial displays with Google ChromeOS yield outstanding display quality, practical design, reliability, and efficient operation.

### More Reliable Together.

LG Commercial Displays with ChromeOS are deployed with reliability in mind with the speed and power to perform smoothly day in and day out by preventing such annoyances as frozen screens, failure to properly load the right content, and slow response times.

### More Efficient Together.

The Kiosk & Signage Upgrade\* unleashes the power of ChromeOS and ChromeOS Flex.\*\* This management license gives you comprehensive security and management capabilities for all your ChromeOS devices, including a cloud-based Google Admin console with configurable remote management policies. Remote monitoring enables you to check the status of each display and overall system health within your network, receive proactive alerts, and remotely reboot if errors occur.

### Faster Together.

A network of LG commercial displays can be deployed quickly, thanks to the ability of the ChromeOS Kiosk & Signage Upgrade to download policies and apps straight to ChromeOS devices. Automatic updates and long-term support ensure ongoing reliability and performance.

### Safer Together.

Security is a top priority in any display network. ChromeOS includes security protocols that block malicious executable files and partitions operating system files so they can't be modified by apps or extensions. Regular security updates keep your network running safe and sound.

## Select Key LG Commercial Display Features\*\*\*

LCD displays with IPS panels yield outstanding brightness and color reproduction with low power consumption

Advanced OLED displays include Open-Frame Curved OLED, Transparent OLED Displays.
